

TUFF AIR CONTROL BOXES

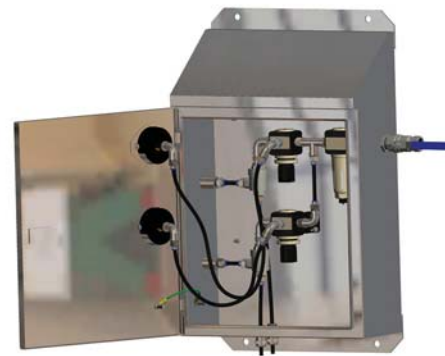

At TuffStuff, we are committed to finding a better way. The TUFF Air Control Box is a great example of that - it's a real performance enhancer.

They're designed to control air quality and pressure to air tensioned cleaners and are available in single or multiple outlet models. All models feature a sealed and lockable cabinet that protects all controls and settings.

Our Performance

- Plant air is filtered, moisture removed and drained
- Quick exhaust valves provide safe dump of air during maintenance
- Hinged front door allows access to all serviceable components
- Controls air pressure to the cleaner tensioners via manually adjusted regulators
- Filtration device protects regulators from plant air
- Pressure regulators allow fine-tuning of air pressure to suit specific needs and maximise performance
- Accessible individual isolation valves for all outlets
- Isolation valve provides easy access for inlet air in case of safety shutdown
- All valves can have locks fitted for isolation.

Our Edge

- Stainless steel fittings and valves
- Stainless Steel lockable and sealed cabinet for hose downs
- Sloped roof on cabinet reduces build up on materials
- Pressure tested during manufacture
- Controlled access for maintenance personnel via lockable cabinet
- TuffStuff is 100% Australian owned and operated.
